Office Action Summary

Art Unit: 1617

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5, 6, 28, 47-49 rejected under 35 U.S.C. 102(e) as being anticipated by Hinz.

Hinz teaches calcium for the treatment of obesity (abstract). A generic multiple vitamin is disclosed (column 8 line 65).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4-6, 27-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hinz.

Hinz is described above. Daily doses of 50-2000 mg are disclosed (claim 7).

As to the claimed food vehicles, the examiner takes notice under MPEP 2144.03 that the claimed items such as spinach are well known, even to the layman, to be sources of calcium in the diet or items that may be fortified with such. Thus, it would be an obvious expedient, even to the layman, to substitute a food source for the multivitamin disclosed in Hinz, for the beneficial effect of the additional nutrients therein.

Art Unit: 1617

As to the claimed restriction of caloric intake, that would also be obvious to the layman as an enhancement to the method of Hinz to achieve an additional or more rapid loss of weight.

No claims allowed.
